

Capillary Tubing

silica glass

stainless steel

Description: Glass or stainless steel capillary tubing connects the Extorr Build-Your-Own Mass Spectrometer to a separate chamber or gas container from which gas will flow to the RGA for analysis. Capillary tubing is available in various lengths, OD, and ID specifications. In addition to the capillary tubing, all capillary tubing orders come with vespel/graphite ferrules or stainless steel ferrules. Orders also ship with capillary plugs if appropriate.
